PROFESSIONAL SUMMARY

A dedicated Frontend developer with experience in building responsive and user-focused web applications and business systems using Angular, React, Next.js, Typescript, and JavaScript. Experienced in API integration, authentication, financial applications, HR systems, and creating maintainable user interfaces. I enjoy solving problems, learning new technology and working with team members to build reliable software that solves real-world problems.

SKILLS SUMMARY

Languages: JavaScript, Typescript, HTML, CSS, SCSS

Frameworks & UI: Angular, React, Next.js, Tailwind CSS, Bootstrap, Angular Material

Backend & Data: REST APIs, Supabase, PostgreSQL, SQL Server

Tools & Platforms: Git, GitHub, bitbucket, Figma, AWS, Nginx, Jenkins, Bold BI

Core Skills: API Integration, Authentication & Authorization, Responsive Design, Form Validation, Dashboard Development, CI/CD

Soft skills: Excellent Communication, Problem Solving Mindset, Time Management, Attention to Details, Analytical Thinking

WORK EXPERIENCE

Jalade Technology Limited

Remote

Intermediate Frontend Developer (Contract)

Jan 2025 – Present

- Built features for Budget Transaction Entry, Sales Transaction Entry, Receipt Entry, Account Reconciliation, and Transaction Enquiry.
- Built a Dashboard Designer that lets users create and customize dashboards within the application, using Bold BI for reporting and data visualization.
- Worked on the Tax Setup module, including tax parameters and tax deduction features used to configure and process tax-related operations.
- Built the Security Policy module, which gives administrators the ability to set application policies such as password requirements and configurations.
- Worked on the Business Setup module, implementing Business Rules and Business Units to help configure and manage business operations within the system.
- Connected features to backend APIs and worked with the team to make sure data was properly captured, processed, and displayed.

Upperlink Limited**On-Site***Junior Frontend Developer (full-time)*

July 2024 – march 2025

- Collaborated with the development team on an HR Management System used to manage employee and HR-related processes.
- Implemented the Payroll module, including features for managing employee allowances and deductions.
- Built the Payslip feature for generating and managing employee salary breakdowns.
- Integrated payroll functionality with employee and HR data within the system.
- Tested and debugged payroll features to identify and fix issues during development.

Hicad System Limitd**On-Site***Frontend Developer (Intern)*

Jan 2022 – August 2022

- Collaborated with the development team to design and implement a booking and reservation application using ASP.NET, Bootstrap, and SQL Server.
- Implemented user authentication and authorization, controlling access to application features based on user roles and permissions.
- Implemented the reservation workflow, allowing users to create and manage bookings.
- Developed responsive booking interfaces using Bootstrap and integrated them with the backend.
- Implemented database operations using SQL Server for storing and managing user and reservation data.
- Participated in testing, debugging, and improving the application throughout development.

PROJECTS

Northstar Blog ApplicationAugust 2026 **[Repository]**

Built a full-stack blog platform with authentication, post management, search, pagination, and database integration.

Food Recipe ApplicationSeptember 2025 **[Repository]**

Built a React food recipe web application, it allows the user to search for any food by their name or category and bookmark. It has features like Restful API for data fetching, crud operation and pagination.

Task Management SystemMarch 2024 **[Repository]**

Built a React food recipe web application, it allows the user to search for any food by their name or category and bookmark. It has features like Restful API for data fetching, crud operation and pagination.

Weather ApplicationOctober 2024 **[Repository]**

Built a weather application that displays current weather conditions and forecasts based on the user's selected location.

EDUCATION

Federal University Otuoke Bayelsa State

Jan 2018 – Dec 2023

B.SC Computer Science & Informatics

Honors: Second class upper division

Deep learning, Software Engineering, Operating System, Database, Machine Learning, Artificial Intelligence, Human Centered Interaction, Information System, Algorithm, System Design.

CERTIFICATIONS & TRAINING

Ultimate React.js & Next.js Course

Nov 2023- Feb 2025

- Learned to build modern web applications using React.js and Next.js.
- Worked with components, state management, routing, API integration, and responsive UI development.

Frontend Web Development (HTML, CSS & JavaScript)

Apr 2022 – Jun 2022

- Learned the fundamentals of building websites using HTML, CSS, and JavaScript.
- Practiced creating responsive layouts and interactive web pages.

Computer Applications & Appreciation

Apr 2022 – Jun 2022

- Learned the fundamentals of computer applications and general computer operations.
- Gained practical experience using common computer applications for everyday tasks.
